MANUAL TWISTER

The **TW01.00** twisting machine consists of 1 rotating head for specialized twisting. The modern touchscreen interface enables precise control, and a barcode reader streamlines setup. Our latest enhancement is an adjustable fixed clamp, providing efficient customization for cable needs, simplifying loading and unloading.

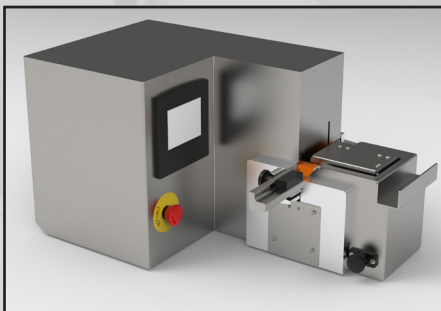

3 HEADS - 2 CABLES TWISTER

The **TW33A.00** Twister machine, featuring 3 rotating heads, excels in efficiency and safety. The modern touchscreen interface and integrated barcode reader streamline setup. The mobile carriage ensures precise cable tensioning, crucial for achieving uniform and precise twisting in every product.

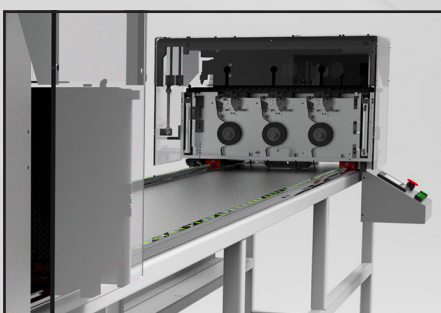

3 HEADS - 4 CABLES TWISTER

The **TW4C.00** Twister machine, equipped with 3 rotating heads, each capable of twisting up to 4 cables, ensures efficient and safe cable manufacturing. The high precision heads are protected, and the modern touchscreen interface allows easy control. Each cable has a separate self-tensioning system to ensure tension before twisting.

SPOT TAPE MACHINE

The Spot Taping **EN082.00** machine with remarkable 3.5 second cycle times. Featuring intuitive tape length regulation through a touchscreen. The machine adapts to tapes from 9 mm to 19 mm seamlessly, providing unique versatility. Beyond speed, its user-friendly design emphasizes easy access and maintenance.

SPOT TAPE TWISTER MACHINE

The **ENTW04** simultaneously twists three pairs of cables and applies tape to both ends. It allows tape length adjustment. This machine significantly improves operational efficiency by reducing the need for human intervention, saving labor, minimizing stock. Protected by a patent, it ensures exclusive access to advanced technology.
